PROTECT YOURSELF FROM THE CORONAVIRUS

Only a few months into the new decade and 2020 has already been quite the eventful year! Locally, Chicago just experienced one of the mildest winters ever recorded, and worldwide the Coronavirus has all of us wondering how to protect our families! Here are some of the prevention tips straight from the CDC (Centers for Disease Control and Prevention):

- Avoid touching your face. Most specifically your eyes, nose, and mouth.
- Keep away from people who are sick.
- If you get sick, stay home.
- Cover your cough or sneeze with a tissue.
- Disinfect frequently touched objects using a cleaning spray or wipe.
- Wash your hands often with soap and water for at least 20 seconds, especially after going to the bathroom; before eating; and after blowing your nose, coughing, or sneezing.

Did you know there are a number of products that can remove germs and harmful bacteria from the air in your home that may cause the cold, flu, or coronavirus? Dynamic Air Cleaners, Germicidal (UV) Lights, and Duct Cleanings are just a few. If you would like more information on these products and how we can help you maintain a healthy home, give us a call!

We would like to send a quick shout out to our local little league baseball and softball team, the Skokie Indians! Their previous season was AMAZING, and we can't wait to see what they have in store for us later this year!
